*Model PGF1TA 2 Stage Series Upflow/Horizontal
Model PGF1TK 2 Stage Series Downflow*

M1200 Product Line

High Efficiency / 80+ AFUE Furnace

- **M1200 - 12 YEAR ALL PARTS LIMITED WARRANTY**
- **M1200 WITH UPGRADED WARRANTY PACKAGE - 12 YEAR ALL PARTS & LABOR LIMITED WARRANTY**
- **Both the standard and upgraded limited warranty packages offer a 12 Year Dependability Promise to replace the entire unit, if the unit's major component (heat exchanger or compressor) fails within the first 12 years of operation, to the original owner. All split system products must be installed with a matched indoor air handler or indoor coil to qualify.**
- **Product registration (by consumer or dealer) required for 12-year Warranty and Dependability Promise within a limited period of time after the installation. See current warranty document for details. This can be viewed at www.maytagvac.com or ask your sales representative.**
- **Dealer is responsible for registration of labor portion of warranty.**
- **Also when registered, this product is upgraded to a limited lifetime heat exchanger warranty.**

The high efficiency 2-Stage gas furnace may be installed free standing in a utility room, basement, or enclosed in an alcove or closet. The extended flush jacket provides a pleasing “appliance appearance.” Design certified by the CSA International (Canadian Standards Association). The product is truly designed with the contractor and the consumer in mind.

Features and Benefits

- **100% fired and tested** — All units and each component (both mechanical and electrical) are tested on the manufacturing line.
- **Best packaging in the industry** — Unique design assures product will arrive to the homeowner dent free.
- **Clean and quiet operation** — Due to the unique design of in-shot burners, location of inducer and use of insulation.
- **Fixed 30 second blower delay** at burner start-up assures a warm duct temperature at furnace start-up. Adjustable blower off settings (60, 120, 160 and 180 seconds).
- **Fixed 30-second post purge** increases life of heat exchanger.
- **SmartStart™ Control Board** — Provides extended life to ignitors in furnaces using hot surface ignition technology. Programmed to learn the heat-up characteristics of the ignitor, then adapt the ignition time to the characteristics of the furnace so the ignitor is energized appropriately.
- **Dependable, hot surface igniter** — Innovative application of an appliance type ignitor with a 20-year history of reliability, assures no call-backs because of handling.
- **Color coded wire harness** — Designed to fit the components, all with quick-connect fittings for ease of service and replacement.
- **Tubular primary heat exchanger** — Heavy gauge aluminized steel heat exchanger assures a long life.
- **Stainless steel** secondary heat exchanger assures a long life.
- **Fixed cooling cycle blower-off delay (TDR)** increases cooling performance when matched with a Maytag coil.
- **Approved for categories I and III venting systems**—May be common, dedicated, or horizontally vented for maximum flexibility in installation.
- **Fully insulated blower cabinet** for quiet operation.
- **LP convertible** — Simple burner orifice and regulator spring change for ease of convertibility.
- **Factory installed drain system** — for reliable performance.
- **Diagnostic light flashes identify limit failure, pressure switch failure and improper ground and polarization** — for easy troubleshooting.
- **Incorporates integrated control board** with connections for electronic air cleaner, humidifier and twinning.
- **Two piece door design** enhances furnace appearance and uses screw fasteners for great fit and accessibility.
- **3 amp fuse** protection against low voltage shorts; protects transformer and control board.
- **Low voltage terminal board** for easy field wiring.

High Efficiency Upflow 80+ Gas Furnace

- Vent switch** protects against blocked flue.
- Roll-out switch.**
- Aluminized steel in-shot burners**, hot surface ignitor and redundant gas valve provide safe, reliable ignition and efficient combustion.
- Remote flame sensor** for proof of carry-over.
- Supply air limit.**
- Gas Valve.**
- Counterflow heat exchanger** orientation and aluminized steel tubular design, means improved efficiency and durability. (Not Shown)
- SmartStart™ integrated control** monitors the burner flame and limit circuit continuously. Blower timing has adjustable OFF settings. Provides humidifier and electronic air cleaner connections.
- Induced draft blower** provides quiet and reliable operation.
- Front door screw fasteners** ensure tight fit.
- Fully Insulated** blower compartment.
- Multi-speed PSC motor/blower** provides quiet airflow, reliable operation, and is installed on a slide out track.

High Efficiency Downflow 80+ Gas Furnace

Multi-speed PSC motor/blower provides quiet airflow, reliable operation, and is installed on a slide-out track. (Not shown)

Induced draft blower provides quiet and reliable operation.

Counterflow heat exchanger orientation and aluminized steel tubular design, means improved efficiency and durability. (Not shown)

SmartStart™ integrated control monitors the burner flame and limit circuit continuously. Blower timing has adjustable OFF settings. Provides humidifier and electronic air cleaner connections.

Pressure switch assures proper operation of the induced draft system.

Supply air limit.

Gas Valves.

Remote flame sensor for proof of flame carry-over.

Roll-out switch.

Aluminized steel in-shot burners, hot surface ignitor and redundant gas valve provide safe, reliable ignition and efficient combustion.

STANDARD EQUIPMENT

Draft inducer; pressure switch; redundant main gas control; hot-surface ignition; timed ON/OFF blower controls (TDR); 40VA transformer for air conditioner application; limit controls; direct drive motor; all models can be converted to use L.P. (propane) gas. Factory approved kits only must be used and are available as an optional accessory from your Maytag distributor.

NOTES:

- Airflow rates of 1800 CFM or more require two return air connections. Data is for operation with filter(s).
- Temperature rises in the table are approximate. Actual temperature rises may vary.
- Temperature rises and airflows for external static pressures greater than 0.5 are for reference only these conditions are not recommended.
- Temperature rise is displayed as High Fire/Low Fire

† = Factory Set Cooling
 * = Factory Set High Fire Heating
 ** = Factory Set Low Fire Heating
 - = Not Factory Recommended

NOTES:

- † = Factory Set Cooling
 - * = Factory Set High Fire Heating
 - ** = Factory Set Low Fire Heating
 - = Not Factory Recommended
1. Airflow rates of 1800 CFM or more require two return air connections. Data is for operation with filter(s).
 2. Temperature rises in the table are approximate. Actual temperature rises may vary.
 3. Temperature rises and airflows for external static pressures greater than 0.5 are for reference only these conditions are not recommended.
 4. Temperature rise is displayed as High Fire/Low Fire

Before purchasing this appliance, read important energy cost and efficiency information available from your retailer. Specifications and illustrations subject to change without notice and without incurring obligations.
